KANISHKA YAPA

Penetration Testing IE3132

01. Method of Delivery- In person
02. Two Hours Lecture One Hour Tutorial
03. Two Hours -Lab
04. Course Material learning resources available on Courseweb

Learning Outcomes

We will cover these skills

- Describe penetration testing related concepts
- Apply information gathering techniques in the penetration testing
- Evaluate the necessary penetration testing tools and techniques in a given scenario
- Develop exploitation code to facilitate penetration testing
- Present penetration testing findings to stakeholders in an effective manner

Skill Evaluation: Assessment Criteria

Component	Weight
Continuous Assessments	50%
• Project Initiation	10%
• Project Presentation Viva	40%
Final Exam	50%

Recommended Reference

D. Stuttard and M. Pinto, "The Web Application Hacker's Handbook: Finding and Exploiting Security Flaws, Second Edition," Wiley, 2021.

Module Content

1. Introduction to Penetration Testing
2. Web Application Security
3. Network Security
4. Operating Systems Security
5. Desktop Application Security
6. Mobile Application Security
7. Social Engineering
8. Exploitation Techniques
9. AI in pen testing
10. Reporting and Documentation

Lecture Panel

Mr. Kanishka Yapa

MSc in Computer Science (Kelaniya) BSc (Colombo)

MPhil in Cyber Security - Sri Lanka Institute of Information Technology (Reading)

CISSP, CISA, CEH, MCSE, MACS

Lecturer

Department of Computer Systems Engineering

kanishka.y@sliit.lk

0718007138

Lecture Panel

Mr. Tharaniyawarma Kumaralingam

BSc Honors in Cybersecurity (SLIIT)

MSc (Kingston University Affiliated)-Reading

CISCO Cybersecurity Essentials

Fortinet Cyber security fundamentals

Assistant Lecturer

Department of Computer Systems Engineering

tharaniyawarma.k@sliit.lk

Lecture Panel

Ms. Helani Herath

BSc(Hons) in Information Technology specialized in Cybersecurity - Sri Lanka Institute of Information Technology

MSc in Artificial Intelligence - University of Moratuwa (Reading)

MPhil in Cyber Security - Sri Lanka Institute of Information Technology (Reading)

Assistant Lecturer

Department of Computer Systems Engineering

helani.h@sliit.lk

Lecture Panel-Kandy

Mr. HASANKA AMARASINGHE

MSc in Network & Information Security

Kingston University, UK

BSc (Hons) in IT Specializing in Cybersecurity

SLIIT, Sri Lanka

Visiting Lecturer

- eLearnSecurity Junior Penetration Tester (eJPT) – INE (January 2025)
- Certified Ethical Hacker (CEH) – EC Council (2022)
- Microsoft Certified: Azure AI Fundamentals (AI900) – Microsoft (2026)
- INE Cloud Associate – INE (January 2025)
- Offensive Security Certified Professional (OSCP) (pending) – Offensive Security
- Certified in Cybersecurity (CC) – ISC2 (2023) and many more….

Thank you
